

Video relay allows Deaf people to make and receive calls in their own language – Auslan – through the NRS.

If you can't hear people clearly over the phone or have trouble being understood, it can be hard to do lots of things like inquiring about a job, ordering supplies or making an appointment.

- You may have to rely on others to make calls for you – missing opportunities and losing control over what is said.
- Texting and social media are great ways to stay in touch with your friends. But lots of people and companies don't use these for work.
- If you can't use the phone, it becomes hard to apply for jobs ... and to keep them.

Trouble using the phone?

On the move Deaf, hearing-impaired and speech-impaired Australians can now make more of their phone calls through the NRS on laptops, tablets and mobile phones.

If you can't use an ordinary phone due to deafness or hearing or speech impairment, the National Relay Service can help you:

- contact employers, services and training opportunities
- make or take work, social or personal phone calls
- have good phone conversations – with less misunderstanding and repetition
- ring relatives and friends who don't use SMS.

No more relying on other people to make your calls! The relay service also makes it easier for other people to keep in touch with you.

The NRS is a solution

TTY Some NRS users make calls on this special type of fixed-line phone using its screen and keyboard. You can read what is said to you if you can't hear, and type what you want to say if you don't speak.

A relay call allows you to communicate with a hearing person who is using an ordinary phone even if you can't hear or don't use your voice.

- The NRS has specially trained staff called relay officers who are the central link in each relay call.
- The relay officer converts voice to text or text to voice. Sometimes they convert from sign language to English.
- In all cases they stay on the line throughout each call to help it go smoothly, but do not change or interfere with what each person says.

How a relay call works

Six good reasons to team up with the NRS

- 1 It's easy to use – thousands of people use the NRS each week.
- 2 You can make calls to anyone, anytime, anywhere in Australia – including to mobile phones.
- 3 Other people can call you – they just use their ordinary phone.
- 4 There is no extra charge for making a relay call. You just pay your regular data or phone costs to make your call through the NRS.
- 5 All calls are confidential – your privacy is protected by law.
- 6 If you have an emergency you can contact a neighbour or police, fire and ambulance through the NRS.

It's simple to get started. Training is free and can be done in your home.

The NRS app is a great way to make relay calls from a smartphone or tablet.

Download our app

The NRS app allows users to make calls through internet relay, Speak and Listen, video relay and captioned relay.

For internet relay and Speak and Listen users there are extra features that are only provided through the app.

The app is available on Apple and Android smartphones and tablets – free from your app store.

How to get started

Find out more about relay calls from our **Helpdesk** Monday to Friday 8am to 6pm (Eastern Standard Time).

- Voice: **1800 555 660** • Fax: **1800 555 690**
- TTY: **1800 555 630** • SMS: **0416 001 350**
- Email: helpdesk@relayservice.com.au

Making an NRS call

- TTY users: **133 677**
- Speak and Listen: **1300 555 727** or **NRS app**

The National Relay Service is an Australian Government initiative funded by a levy paid by eligible telecommunications carriers.

Deaf? Trouble hearing? Trouble speaking?

Stay connected through the National Relay Service

...it's your call

... it's your call

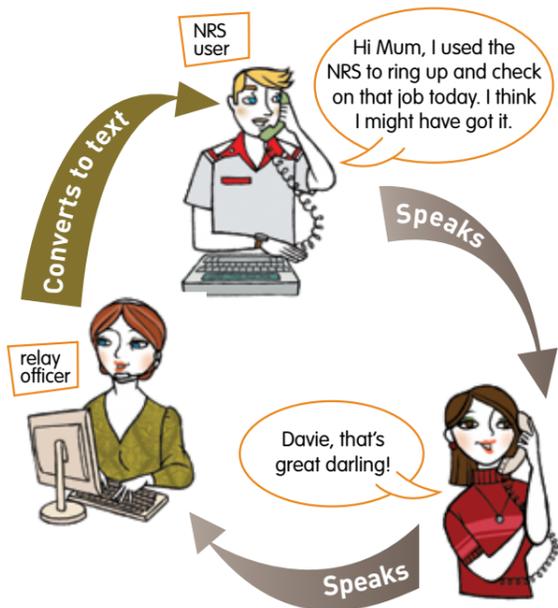

A phone solution for people who are deaf or have a hearing or speech impairment

An Australian Government Initiative

CALL OPTIONS – PICK WHAT SUITS YOU

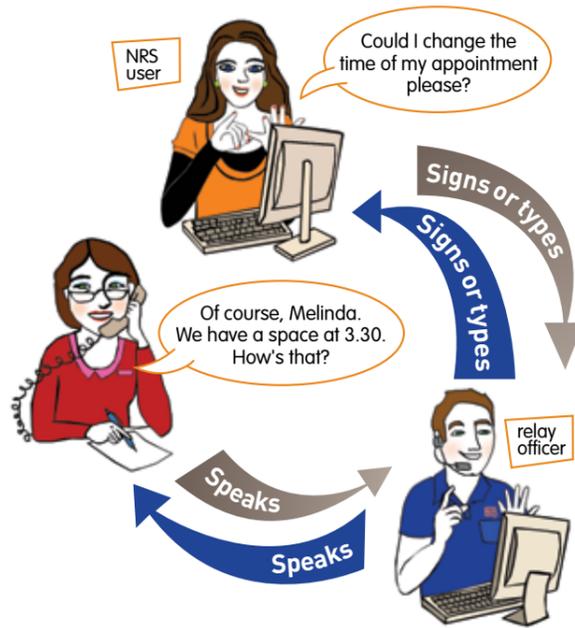

'I don't hear well on the phone but I do speak'

- Speak directly to the other person
- Read their words provided by the relay officer

USE

'I'm deaf and prefer not to speak on the phone'

- Sign or type your side of the conversation to the relay officer who speaks your words to the other person
- Watch or read the other person's responses provided by the relay officer

USE

'People have difficulty understanding me on the phone'

- Speak directly to the other person – the relay officer will re-speak any words as required
- Listen as the other person speaks directly to you

USE

Captioned relay

Talk directly to the other person and read their words on your screen.

You need: a phone plus internet connection – for example an ordinary phone with a computer, or just a smartphone.

CAPTIONED RELAY

Video relay

For Auslan (Australian Sign Language) users. Limited hours. The relay officer communicates with you in Auslan and with the other person in English.

You need: a fast internet connection on a computer, tablet or smartphone, plus a webcam.

VIDEO RELAY

Speak and Listen

Speak directly to the other person and listen as well. The relay officer will re-speak any of your words not understood by the other person.

You need: any phone – an ordinary phone, a smartphone or ordinary mobile. Use the NRS app. It has extra functions for Speak and Listen callers.

SPEAK AND LISTEN

OR

Speak and Read

Talk directly to the other person and read their words on your screen.

You need: a special phone called a TTY.

SPEAK AND READ

Type and Read

Type your side of the conversation and read the other person's words on your screen.

You need: a special phone called a TTY.

TYPE AND READ

Type and Listen

For those who don't want to use their voice on the phone.

Type your side of the conversation and listen directly to the other person on the phone.

You need: a special phone called a TTY.

TYPE AND LISTEN

Or you can try these two call options – suitable for most NRS users

Internet relay

Type your side of the conversation through the NRS website and read the other person's responses provided by the relay officer on your screen.

You need: a computer, tablet or smartphone. The NRS app has extra functions for internet relay callers.

INTERNET RELAY

SMS relay

Text your side of the conversation and read the other person's responses provided by the relay officer.

You need: any mobile phone.

SMS RELAY

IT'S YOUR CALL
